About KALA Health, Inc.

About our Founder

KALA Health, Inc. was founded in 1997 as a manufacturer and distributor of natural health products by Ronald Breteler, Ph.D., who serves as President of the company. Dr. Breteler has worked in the natural food industry since 1980. Born and educated in the Netherlands, Canada and the USA, Dr. Breteler spent the first twelve years of his career conducting research in four continents, and has publishing over 50 scientific research papers. Working closely with Dr. Poovaiah, a biochemist and expert on natural anti-inflammatory products, and Phil Brown, DVM, a veterinarian and expert on Ester C, Dr. Breteler developed the first in a line of chewable supplement tablets, Arthrix for Dogs and Cats, a product designed for aging animals. Arthrix quickly became a top seller in the US, and currently enjoys top ranking among pet joint support supplements in SW Asia and Eastern Europe.

Our History

In 2001, KALA Health entered into an exclusive manufacturing agreement with Formulation Tech, the leading pet supplement formulator in the US specializing in chewable tablets. This allowed KALA Health to develop a wider range of chewable products to meet the growing demands of pet owners looking for alternative pet health solutions.

In 2004, KALA Health acquired Landco Corp., the manufacturer of Comfort and GoldVet supplements exclusively available through veterinarians, thus greatly expanding the KALA Health line of products. The Comfort and GoldVet product lines, as well as Arthrix, Arthrix Plus, Dermatrix, Vitalmix, Fortrix and Calmix are sold through thousands of veterinarians, pet clinics, retail stores and animal product mail-order companies worldwide.

During the past ten years, KALA Health's reputation as a quality manufacturer of chewable supplements

for pets has attracted several leading pet product distributors in the US and abroad for which KALA Health now produces private label products. This program significantly expanded our distribution network, while at the same time allowing other companies in the pet industry to produce safe and healthy products with the KALA Health quality and standards. We are devoted to continually look for novel and beneficial ingredients and formulations to foster and promote maximum pet health.

With our dedication to quality, selective use of pharmaceutical grade ingredients and proven track record of beneficial products with extraordinary palatability and easy of administration, KALA Health continues to grow. We will continue to support pet charities and animal related non-profit organizations to the betterment of our beloved animal companions.

Our Organization

KALA Health, Inc. is a virtual company, indirectly employing a staff of over 30 dedicated professionals. Each member of the KALA Health Team has built a reputation of excellence. Warehousing is located in Grawn, MI, and production in Oakdale, CA. Product manufacturing takes place in accordance with cGMP regulations. In addition to online sales through several company websites and the Idaho sales staff, international product distribution is coordinated by KALA Health International BV., our European distribution company located in The Hague, The Netherlands. Other major distribution centers are located in Singapore, Latvia, Australia and Japan.

The goal of KALA Health is to provide its customers with the best health care products and ingredients on the market. We pledge to never buy cheap substitute ingredients. If you are not completely satisfied with our product(s), please email us and let us know. If we can't make it right, we ask you to return the product and we will gladly refund you your money.
